Mr. Dulles advised the Director that the NSC Senior Staff this afternoon would consider the JCS proposal re "Hot Pursuit" in Manchuria. The DCI indicated that he favored the JCS language. The DCI suggested that CIA's position be guarded but that it should be made plain that CIA is in favor of the JCS language if they are satisfied that it gives sufficient latitude to the military commander. The DCI also pointed out that CIA had made an estimate relating to this proposal and had concluded that war would not likely result from a single incident unless the Soviets desired it in any event.
